

NOW WE'RE TALKING

DUTCH

[training – coaching]

Many companies based in the Netherlands offer international employees Dutch language courses. Although internationals often don't need Dutch for work, speaking the local language can make you feel more at home and connected. En wie wil dat nou niet..

DUTCH

Even though English is the primary language in today's business world, knowing Dutch is more important than ever. If you speak the local language, it enables you to establish a better and more professional relationship with both colleagues and clients.

Based on the (international) challenges in the organisation we provide the tools to communicate in Dutch with increased confidence. We have an individual approach focussed on personal needs, objectives and daily work. All our courses are tailor made. And offered within the safe environment of your own work space. In a fun and interactive way. The content is based on theory and is complemented with other tools such as podcasts, videos, films, articles and blogs.

YOU WILL LEARN

1. improved vocabulary and idiom
2. to understand (complex) grammar points
3. about pronunciation & conversation skills
4. cultural differences and tact & diplomacy
5. accurate language use
6. increased confidence
7. to listen better and to be better understood
